

## What does Aesop mean for you?

### Value.

As a school district business manager, you face a myriad of issues every day that compete for your scarce time and often limited budget resources. We understand how challenging it can be to effectively accomplish your goals for your district. That's why we built Aesop.

**A**esop is an automated substitute placement service for K-12 school districts. Unlike traditional "sub-calling" programs, Aesop's patented Software-as-a-Service (SaaS) model does not require any installations at the district office. Users simply log in via the web or phone anytime, anywhere. Aesop saves countless hours of manual sub calling, while capturing rich streams of data for better business management.

After working with hundreds of school district business officials across the world, we have addressed some of these common concerns:

**"Our district is too small for an automated sub placement system."** Not anymore! Aesop's SaaS model does not require equipment investments or ongoing maintenance fees. Instead, you pay only for the number of employees actually using the system. Aesop saves time and money for districts of all sizes and typically costs less than paying a sub-caller. Plus, Aesop works for you 24/7, and you never have to pay it overtime or employee benefits.

**"We need a better way to gather and input data for our payroll process."** Aesop helps districts streamline the flow of information for employee absences and substitute work history. Custom reports and policy settings are designed to reflect your business rules and processes. Aesop provides many districts with entirely automated data flow from Aesop to their payroll systems, dramatically improving efficiency.

**"Our budget is tight. We must be accountable for every expense."** Your subscription to Aesop is scaled to your district's size and remains steady over time, without periodic spikes for system upgrades or maintenance contracts. Aesop automatically captures data to provide compelling graphical analysis of important absence trends, giving administrators better control over the district's largest expense: payroll.

**"We can't afford unreliable programs or vendors. What assurances do we have with Aesop?"** Aesop offers a 30-day "no-questions" cancellation policy that you may invoke at any time. We pioneered the innovative SaaS automated placement service and have a proven record of reliable functionality and exceptional customer service with over 2,000 districts worldwide. Hundreds of districts have switched to Aesop from other systems, and not one has ever switched back.

*"Our district had given up on the various automated systems because the cost was prohibitive for systems our size. Finally, a program is available that offers exceptional service. . . yet is affordable."*

—Assistant Superintendent, Georgia

As you work to prioritize your many responsibilities and increase district efficiency, let Aesop's automated placement and management service save you the valuable hours and resources you need to efficiently manage your district.

### What does Aesop mean for Business Managers?
